If you prefer the modern styling of tri-level design then the Melody will capture your heart. Spaciousness is accentuated in the over 1,400 square feet of luxurious living space designed with the modern family in mind. Three complete bedrooms, all located on one floor and away from family disturbances, provide the perfect slumber area. There is a spacious main bath and a much desired bath adjoining the master bedroom. Modern bath fixtures, deluxe medicine cabinets with large mirrors, ceramic tile, and a beautiful vanity, enhance the main bath. The main living area includes a formal living room with a wood burning fireplace with raised hearth for that touch of elegance. A paneled living room and dining room wall add a touch of luxury and you'll love the large picture window. The beautiful kitchen with its well planned counter area and "dream" cabinets will please the most discerning. The Melody features an extra long garage to provide for extra storage and workbench space and is easily accessible to the family room -- excellent for carrying those groceries to the kitchen area only steps away. The garden level family room offers that much needed space for T.V. viewing, games, or family "get togethers". For the discriminating buyer who wants even more room than average, a fourth level basement is also available. A variety of exterior designs indicate the care taken in planning every detail of this fine home - the Melody, the "Star" feature of Melody Homes awaits you.
